To The Editor:

All during the year, many concrete planters around town are blooming with seasonal plants.

The floral arrangements are designed in such a way to exhibit the beauty of whatever plant is there. These planters are maintained by the Watertown Garden Club.

We would like to thank them for their time, care and dedication to keeping these plants looking beautiful.

The planters we speak about specifically are the two outside the Town Hall on DeForest Street.

Every day we see these beautiful planters with such healthy plants and it provides an uplifting feeling. On hot days, the members of the garden club come out with milk jugs filled with water to make sure their hard work is well taken care of.

I've seen them out there pruning and dead heading the plants and it's done with great care. It has also been noticed that regardless of the weather, these plants are nourished.

Thank you Watertown Garden Club! You do a wonderful job and it is greatly appreciated.

The Town Hall employees
